Concrete Cutting Services

Team Elmer's has the tools and expertise to handle any concrete cutting job regardless of size, complexity or job conditions.

Wall Sawing

Team Elmer's can cut wall to a depth of 24" from one side and 48" with access to both sides. Rebar and other steel re-enforcement can be cut with ease. These saws are hydraulic driven and use water to minimize dust.

All cuts are plumb and smooth. Commonly used for door and egress window openings.

Slab Sawing

Team Elmer's has a gas and electric slab saws for indoor and outdoor cutting. We also have a small electric saw that can be carried into basements for difficult access jobs. We can cut up to depths of 24". All saws use water for minimal dust and the slurry is vacuumed up when finished. We perform small residential to large commercial road cutting jobs. Common uses include trenches for plumbers, floor slab removal, and relief cuts.

Core Drilling

From 1/2" to 42" round penetration in walls and floors with virtually no limit to depth Team Elmer's has it all. We have electric and hydraulic units and all use water to minimize dust. Rebar and re-enforcing steel can be cut through with ease. Commonly used for manhole taps, pipe, and ductwork penetrations.

Floor Grinding

Diamond grinder can remove high spots in concrete slabs caused by curling or uneven construction. It can also be used to remove carpet glue or tile grout. Grinds up to 1" of material and is commonly used to eliminate tripping hazards, etc. Not intended for a polished final appearance.

Wire Sawing

This unit is unlimited in its capacity to cut any thickness or diameter concrete structure in any location. A hydraulically driven diamond cable is used for cutting.

**All trucks are self-contained, equipped with power supply, water and multiple tools to handle all needs in the field.*

We take pride in the reputation we have earned over the years for customer service, honesty, quick response time, innovative, economical solutions, and expertise in the fields in which we work. We appreciate each job and every customer, and seek to build long lasting relationships with our clients.
