

Sidewalk Construction Underway On Kelley Street Through August 7

By Beth Milligan | July 18, 2020

The City of Traverse City, Machin Engineering, Elmer's Crane and Dozer, and Bella Concrete Construction crews started constructing new sidewalk on Kelley Street Friday - a project expected to last through August 7.

New sidewalk will be built in the follow segments of the corridor: The south side of Kelley Street between Barlow Street and Grant Street, the north and south sides of Kelley Street between Bates Street and Rose Street, and the south and west sides of Kelley Street between Rose Street and Fern Street. Affected street segments will be closed to through traffic when workers are present.

On-street parking will be prohibited at the work zones. Delays can be expected during the project period.
